		•
Description	Expense	·s
Research: The Evans Foundation directly performs research into several biophysical and biomedical areas, with a focus on the self-assembly of biological and bioinspired molecules, and neurodegenerative diseases related to $\alpha$ -synuclein and other protein aggregation, such as Multiple Systems Atrophy. We perform research both on our own and through collaboration with several university labs. In 2015, we gave an invited talk on our research at the Gordon Research Conference on Self-Assembly and Supramolecular Chemistry, and gave presentations at the DNA Computing and Molecular Programming Conference and the Molecular Programming Project Retreat, amongst other venues. We authored a chapter of the Encyclopedia of Algorithms, 2nd Ed., published software for DNA tile system design, and completed a major update to our previously-published sequence design software (all our software is made freely available online). With the Winfree, Rothemund and Qian labs at Caltech, we worked to construct a reliable framework for the design and implementation of self-assembling DNA tile systems, and on more robust DNA sequence design for molecular computing.	\$	108,635.19
Scientific Community Outreach: The Evans Foundation undertakes outreach to the scientific community directly to encourage interest in researching often-neglected diseases like Multiple Systems Atrophy. This is achieved through direct discussions with researchers, both in meetings, via emails, and at San Diego area biotechnology and pharmaceutical networking events, including events at UCSD and the San Diego Opera's Life Sciences event, as well as through conferences attended by our employees such as those mentioned in our Research summary above.	\$	25,692.87
Public Outreach and Education: The Evans Foundation provides education on Multiple Systems Atrophy and similar rare and non-Parkinson's neurodegenerative diseases to the general public, as well as especially patients and their caregivers. This is achieved through emails, direct communication with patients and caregivers, and the development of our website and other online locations. We provide information on the diseases, explanations of current research, trials, and future potential treatments, and information on living with such diseases and caring for patients, with an emphasis on new technologies to enhance quality of life and on the potential for novel, high-risk high-reward research ideas. As part of this project, we evaluate new information	\$	23,279.22
